EDUCATION

Western Mindanao State University

Bachelor of Science in Computer Science

Normal Road, Baliwasan, Zamboanga City

August 2022 – June 2026

TECHNICAL SKILLS

Languages: Typescript, Python, Javascript, SQL, HTML/CSS

Frameworks & Libraries: Next.js, React, Node.js, Express, Django REST Framework, Tailwind CSS, Zustand, Axios

Databases & Services: PostgreSQL, Supabase, Firebase Auth, Neon

Developer Tools: Git, GitHub, VS Code, Antigravity IDE, Postman, Vite

Cloud & Deployment: Docker, Vercel, Render, Netlify, Cloudinary CDN, Resend API, SMS Gateway

Design Tools: Figma, Canva

PRE-PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern

May 2025 – May 2026

Practicum / Industry Immersion (CS 141)

Western Mindanao State University, Z.C.

- Sole developer of a university-wide sports portal for WMSU's Smart Campus initiative, architecting a 20+ table PostgreSQL schema, 22 RESTful API route groups, and a React 19 frontend with 12 state stores.

Full-Stack Developer

Feb 2025 – May 2026

Thesis

Western Mindanao State University, Z.C.

- Architected and developed the full-stack web application (React/Vite, Django REST Framework, PostgreSQL/Supabase) as the primary contributor (~91% of commits), delivering digital case management, role-based access control with Firebase Auth, automated document generation, and an analytics dashboard.

Freelance Developer & UI/UX Designer

Sep 2023 – Dec 2025

- Designed the end-to-end UI/UX for 'Kindiverse', a culturally responsive educational app for children ages 3–8, client achieved a top 1.25 final presentation grade, by developing 216 developmentally appropriate, high-fidelity screens featuring interactive storytelling and play-based learning modules.

PROJECTS

WMSU Sports Portal | [React](#), [Node.js](#), [Express](#), [PostgreSQL](#), [Socket.IO](#), [Firebase](#) | [REPO](#)

May 2025 – May 2026

- Developed a public-facing portal with live scoreboards, tournament bracket visualization, event calendars, and PDF/image report exports for university-wide transparency.
- Implemented JWT + Google OAuth dual authentication, role-based access control (Super Admin/Admin), Zod schema validation, and Helmet security headers across the full API surface.
- Containerized the backend with a multi-stage Docker build and deployed the frontend on Vercel, integrating Firebase OAuth, Cloudinary CDN, and Neon serverless PostgreSQL for a fully cloud-native architecture.

HearEase | [React](#), [Django](#), [Supabase](#), [Resend API](#), [SMS Gateway](#) | [REPO](#)

Feb 2025 – May 2026

- Built RESTful APIs for case workflows, hearing scheduling, and multi-channel notifications (email via Resend, SMS via Android gateway), and integrated a Deep Neural Network model into the scheduling pipeline to automate hearing date prediction and case resolution forecasting.
- Implemented real-time notification/verification systems, Zustand state management, and lazy-loaded routing, deploying to Vercel (frontend) and Render (backend) for a pilot deployment in Barangay Tetuan, Zamboanga City.
